

THE DAILY APPEAL.

TUESDAY MORNING, SEPTEMBER 15, 1857.

WEEKLY APPEAL.

Our MAMMOTH WEEKLY, made up of six daily editions, goes out to its numerous, and rapidly increasing patrons, to-morrow morning. Since the election in this State has been decided, we have made it a point to publish various political news, and to afford to our readers full information relative to its consequences.

In the Southern number will be found a large amount of miscellaneous reading, besides current intelligence from all quarters, derived from the telegraph and the mails.

Our commercial intelligence is full and reliable. We publish our usual amount of local news, too.

The Weekly may be bought in packages or by the single copy, at our counting-room or Madison street.

CARNA'S KOMMUNIKATES beat the world.

See advertisement of a lost value in another column.

Mrs. R. T. REEDMAN, agent, has our thanks for late notices and St. Louis papers brought by the steamer *Twelfth*.

Our thanks are due Mrs. CUNNINGHAM, clerk of the five steamers Michigan for files of late New Orleans items.

SERIOUS ACCIDENT.—We understand that Mr. JOHN GARDNER, of this city, was thrown from his horse on Saturday evening last, and it is thought that the accident will be of serious consequence.

TRAGEDY.—The steamer *Kensico* and *Alexander*, of Hudson, with a number of passengers, were lost at sea.

FRANCE.—The Empress Napoleon and Alexander, of Hudson, were lost at sea.

FRANCE.—The steamer *Ohio* state river, at four feet steam, from Louisville to Cincinnati, and falling.

Capt. CARPENTER's packet *Belfair*, from New Orleans, left us at the upper wharf for pairs and a better stage of water.

The fine and popular packet *Ernestine*, of New Orleans, left us at eight last night, and arrived at a late hour. She will probably be at the wharf to-day, and at eight the levee looked almost deserted, there being only five boats, which have been laying up during the summer. We notice several packets laying up on account of the bad stage of water, and should that continue long, we may expect a general stoppage.

FRANCE.—The latest reports from Paris say that the Ohio river state of water at four feet steam, from Louisville to Cincinnati, and falling.
